## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Group I in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 7-12 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

### *Specification*

2. The use of the trademark Gortex® and Lycra® has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mahn, Jr. (US 5411783). Applicants claim an article comprising a base layer and a release coating thereon (e.g., a vinyl compound, a polyurethane compound or a silicone compound), wherein the release coating exhibits a heat and

Art Unit: 1774

pressure resistant debossed or embossed impression complementing pattern, and wherein said cover sheet exhibits the property that, when placed with its release coating against and in registry with the thermoplastic surface of an emblem and heat and pressure are applied on said cover sheet and toward the emblem, the pattern is formed on the thermoplastic surface of the emblem. Mahn, Jr. discloses a heat-activated appliqué comprising a base and a thermoplastic elastomer layer. *See* Abstract. The elastomer layer is equivalent to applicant's release coating—it comprises polyurethane or a vinyl compound. *See* col. 2, ll 33-53. The layer, moreover, is embossed. *See* col. 26-46. The substrate layer is equivalent to applicant's base layer. It comprises fabric. *See* col. 2, ll 30-31. With respect to the claimed registry property, "it is elementary that the mere recitation of a newly discovered function or property, inherently possessed by things in the prior art, does not cause a claim drawn to those things to distinguish over the prior art." *In re Swinehart et al.*, 169 USPQ 226 at 229. Since the Mahn, Jr. medium teaches all of applicant's claimed compositional and positional limitations, it is inherent that the medium functions in the manner claimed by applicants. The burden is upon the "applicant to prove that the subject matter shown to be in the prior art does not possess the characteristic relied upon." To date, this burden has not been sustained. The limitations of the claim are met by the disclosure of the reference.

### ***Claim Rejections - 35 USC § 103***

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mahn, Jr., as applied to claims 1-3, above. With respect to the claimed method of forming the embossments, "even though product-by process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the

Art Unit: 1774

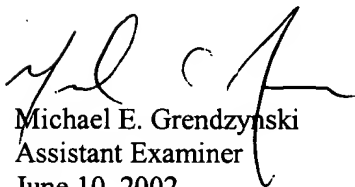

claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 227 USPQ 964, 966. Once the Examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. *In re Marosi*, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983). See MPEP §2113.
